ATS-650

Cross Cutting Machine

Description

The used engine power and the quality of sliding guides of the mandrel-holder beam make the machine suitable for working to every type of material, with always excellent results. The high versatility of the machine is guaranteed by an in-line mechanical system with simple calibration. Thanks to this it's possible to change in short time the size of the material witch it would like to obtain. The machine is equipped with five blocks to be able to produce the five most used sizes.

Technical characteristics

Max blades motor power	7.5kw
Max working width	650mm
Max cutting thickness	35mm
Blade shaft diameter	50mm
Blade flange diameter	230mm
