

AT-A650

Automatic Cross Cutting Machine

Description

The machine automatically performs cut to measure of the material, taken in self-contained way the quote preset by the operator on the control panel. It's possible to program fixed measures or random slabs. The square cut is guaranteed by a sliding system and pneumatic cylinders. The cross-cutting machine could be also used in a simply manual way. The used engine power and the quality of sliding guides of the mandrel-holder beam make the machine suitable for working to every type of material: marbles, granites, porphyries and natural stones, with always excellent results.

Technical characteristics

Max blades motor power	11kw
Max working width	650mm
Max cutting thickness	60mm
Blade shaft diameter	50mm
Blade flange diameter	230mm
Blades diameter	400mm
